

Hi All

Top Band DF Report to RADARC and Mid Thames DF Group.

Not sure if anybody heard me in the Reading Area on the hidden station G3TRY/P last Sunday. (Report as being heard in Twyford)

The site was in between The Bader Way and Colemansmoor Road, very near to the Winnersh Triangle and the River Loddon with the lakes that feed it.

There was 11 teams out starting from Lane End near High Wycombe looking for 2 stations, the other being towards Slough and Beaconsfield direction, as my station was the furthest from the tea and prize giving location a large amount of teams came to my station first.

8 out of 11 found me and it seemed to be the way to do it as those coming in from Kingsford Close (North of me) got bad signal directions when near/near the National Grid power lines and started to go in different directions and not getting to me.

**My Site location setup and transmitter.**

The contest ended at 16:30 and it was all back for a meal and prize giving.

Prize giving - Justin Snow G4TSH on his own won the event and receiving the Event Trophy for 2019.
